

PACKAGE LEAFLET: INFORMATION FOR THE USER

HYDROMOOR™

Hypromellose 0.3%, eye drops without preservative unit dose HPRM 0.3%

Description

Each **single dose unit** contains 0.4 ml of sterile Hypromellose 0.3 % w/v Eye Drops without Preservative. There are 30 single dose units in each carton.

The **other ingredients** are Sodium Chloride, Potassium Chloride, Borax, Boric Acid and Water for Injections.

What is HYDROMOOR™ and what is it used for?

HYDROMOOR™ eye drops are used for the relief of the symptoms of dry eye conditions associated with the lack of natural tears or lubrication with rigid or gas permeable contact lenses. Such symptoms may include discomfort, a chronic gritty sensation, disturbance of vision and increased sensitivity to light. These eye drops are suitable for use by people who are sensitive to preservatives.

Sterility of HYDROMOOR™

HYDROMOOR™ has been manufactured using aseptic processing techniques. It can not be resterilised.

Precautions - Before you use HYDROMOOR™

Do not use HYDROMOOR™

- if you are allergic (sensitive) to any of the ingredients listed above,
- if the seal is broken.

Discontinue use and consult a physician

- if irritation persists or worsens, or headache, eye pain, vision changes or continued redness occur.

Using other medicines

- if you use more than one eye drop, wait 5 minutes before putting the next one in to prevent the first drop from being washed away.

Pregnancy and breast-feeding

- Ask your doctor or pharmacist for advice if you are pregnant or breast-feeding.

Possible side effects

Sometimes HYDROMOOR™ can cause minor side effects such as mild stinging or blurred vision, but these effects are usually minor and temporary. **Do not** drive or operate any machinery until your vision has returned to normal. If you notice any side effects not mentioned in this leaflet or your symptoms worsen, please inform your doctor or pharmacist.

Administration - How to use HYDROMOOR™

Adults, elderly and children.

Instil one drop into each affected eye as required. Avoid touching the eye with the dropper. If the drop of medication is not retained for any reason, another drop should be instilled. Leave an interval of at least 5 minutes before the instillation of another eye drop.

Figure 1

Figure 2

Figure 3

Figure 4

1. Wash your hands
2. Open a single dose unit by twisting and pulling off the cap (see Figure 1).
3. Carefully pull down the lower eyelid to form a space between the eye and the eyelid (see Figure 2).
4. Gently squeeze a drop into the eye but do not touch the eye with the tip (see Figure 3).
5. Close the eye for 30 seconds then open your eyes and blink a few times (see Figure 4).
6. Repeat these instructions for the other eye if required.
7. Wash your hands.

Disposal

HYDROMOOR™ is preservative free. Please dispose of each single dose unit after use in an environmentally friendly way.

Storing HYDROMOOR™

Store below 25°C.

Use once and discard the single dose unit.

Do not use after the expiry date printed on the box.
